

Facility Protection, Emergency Planning and Evacuations

Facility protection, emergency planning and evacuations is a critical service for security directors, loss prevention and human resource executives, law enforcement officials and all individuals entrusted with facility safety and security responsibilities.

Vigilantly safeguarding a corporate, aviation, arena, educational, retail, government or industrial facility with physical, personnel and informational security procedures and policies is paramount in an era of criminality, workplace and school violence, terrorism and the potentiality for natural disasters.

Facility protection training and development will enhance the participant's knowledge of assessing the security and safety requirements of a facility and enable a transformation to sound systematic strategies for protecting individuals, property and information. Subsequently, application of this training will improve the environment, reputation and survivability of an enterprise.

Concrete scenarios of deficient and comprehensive facility protection will be presented, reviewed and evaluated including facets of:

- **Crime Prevention (CPTED)**
- **Access Control**
- **Investigations**
- **Report Writing**
- **Contract Vs. Proprietary Security Personnel**
- **Post Orders, Policies And Procedures**
- **Communication/Documentation Of Incidents**
- **Personnel Safety Training**
- **Protection Of Sensitive Information**
- **Security Personnel Development/Management**
- **Defense In Depth, Risk Management, Target Hardening**
- **Emergency Planning**
- **Crisis Management Team/Advisors And Evacuation Exercises**
